EU member states

Climate Protection

A Challenge and an Opportunity for the European Union

The European Climate Initiative (EUKI) is a project-financing instrument by the German Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU). It is the overarching goal of the EUKI to foster climate cooperation within the European Union (EU) in order to mitigate greenhouse gas emissions.

To find out more about the EUKI and its current projects as well as future calls and application modalities, please visit www.euki.de

Objectives of the European Climate Initiative

Target groups are governments, municipalities, civil society, academic and educational institutions and businesses.

The geographical focus lies on collaborating with Central, Eastern and Southern EU member states.

Projects supported within the EUKI contribute to the following objectives:

Strengthening knowledge and raising awareness in order to encourage climate protection and the ecological, social and economic opportunities connected with climate action.

Fostering the exchange of good practices, transfer of knowledge and experience and building of networks in order to support transformative processes and favourable framework conditions for mitigation of greenhouse gas emissions.

Building a bridge to EU programmes through capacity building as well as leveraging European funds into innovative and progressive climate action.

EUKI Project Examples

Urban Redevelopment in Lithuania

As part of the project, the Housing Initiative for Eastern Europe (IWO) and the Association of Local Authorities in Lithuania provide trainings for 22 municipalities in the field of energy-efficient urban renewal. The trainings are inspired by good experiences from Germany. As part of the capacity building, managers for urban development create resource-efficient refurbishment concepts for their respective communities.

Just Transition

This WWF project promotes dialogue between stakeholders at local, national and European level on structural change in Southern and Eastern Europe in light of energy transition. The project aims to develop just transition strategies for economic transformation of coal regions in Bulgaria, Greece and Poland. It uses practical examples from the German Ruhr area and fosters mutual exchange of experiences between the regions.

EUKI Funding

Call for Project Ideas

Who?

Applicants eligible for EUKI funding are entities such as governments, municipalities, academic and educational institutions as well as non-governmental organisations and non-profit enterprises.

Where?

The EUKI supports bilateral and multilateral climate projects with actors in the EU member states, primarily in Central, Eastern and Southern Europe.

Which sectors?

Possible thematic areas include all relevant sectors such as energy, industry, transport, households, commerce, trade and services, waste, agriculture and land use as well as crosscutting topics.

For in-depth information, please consult the documents and information made available on www.euki.de

BMU Tenders

Additionally, the EUKI promotes measures through tenders along main policy priorities as identified by the Federal Ministry for the Environment.
