The MENERGERS impact in Bulgaria

Local activities generated through the MENERGERS project

- The concept and structure of the "Municipal Energy Manager" Department (MEM) model has been clarified.
- The importance of energy planning and control of energy costs is realized..
- Political support has been secured in the pilot municipalities.
- Implementation of the Model has started..

Teams are structured.

Communication channels (internal and external) have been created for the exchange of information on energy consumption in municipal facilities.

Databases have been created for municipal facilities. They are of key importance for carrying out analyzes and assessments and for planning the necessary activities.

The MENERGERS impact in Bulgaria

How did the city change, due to the MENERGERS project?

What impact did the project have on you or your team's professional abilities?

- Partner relationships with organizations that deal with energy planning and energy management have been strengthened.
- New partnerships have been created.
- The project played an important role in increasing the capacity and knowledge of regional authorities in the field of energy planning and management.
- The project contributes to a change in the way of thinking of the interested parties (consumers and regional authorities) in the direction of "smart" energy consumption.
- It inspires the use of sustainable approaches to energy planning.
- Stimulates the exchange of experience and best practices for energy management.
